Adjust the control wire position. Install the 2 screws.

Control Unit Wire Adjustment

**Model: SKRW-IS, SPRW-IS**

When attaching the control unit to the bottom of the table top, follow the steps below.

1. Slide the control lever all the way to Ignition position
2. Slide the control lever all the way to Stop position
3. The lever has to be centered in this position
4. If not centered correctly, there may be issues while trying to ignite the flame

Adjust lever position

- Use a flat screw driver to open the cover.
- Correctly adjust the lever's position by turning the gold knob. Reference the diagram above for correct positioning. Close the cover after checking.
